PROJECTS

ELI- a personalized AI assistant

Mar 2026 - Apr 2026

Developed an AI-based system to automate laptop and mobile tasks with basic emotion-aware responses. Focused on improving user interaction using simple ML concepts, enhancing productivity and personalized control.

Guess-the-number

Apr 2026

Developed a "Guess the Number" game using programming logic where the system generates a random number and the user attempts to guess it with hints. Focused on loops, conditions, and user interaction.

ECOWELL

Aug 2025 - Feb 2026

Developed a 24/7 AI-based health assistant that provides diet suggestions, precautions, and basic medical guidance. Designed to enhance user awareness and support decision-making using simple AI and data-driven insights.

SKILLS

- AI Image Generation
- MS-PowerPoint
- MS-Word
- ChatGPT
- Claude

EXTRA CURRICULAR ACTIVITIES

- Dedicated CSE student skilled in Python, Java, and UI/UX design. I blend technical logic with user-centric aesthetics to create impactful solutions. Proactive in self-learning, I leverage AI tools and MS Office to maximize productivity. I am seeking an internship in Digital

Marketing, Content Writing, or Sales, where I can use my analytical background and communication skills to drive results. I am an adaptable, quick learner eager to contribute to your team's success.

ADDITIONAL DETAILS

- Attended SIH, Anveshna, GEC Internal, Meta, and Synergy hackathons. Won GEC Internal and 2 debate competitions. Led hackathon teams consistently, showing strong leadership, teamwork, and problem-solving skills.
